

Westwind School Division 2023-2026 Three Year Capital Plan

Westwind School Division has placed a New Raymond High School as the only Capital Plan priority for the last 4 years. On December 10, 2019, Westwind School Division received Planning Funding to complete site analysis and site readiness for the proposed project, visioning and detailed program development, architectural concept design and rendering, and preparing presentation materials for a new High School. This work was completed, and the Division is very pleased with the deliverables from that stage. On March 4, 2022, Westwind School Division had announced by the Minister of Education that Design Funding was approved for plans towards a New Raymond High School. Westwind School Division feels very fortunate to have received this announcement. It is our understanding that Westwind will work through the Design Funding stage over the following year from its announcement.

Westwind School Division has not yet received a full Construction Funding announcement and will keep as its number one priority the New Raymond High School.
